

Seesaw | Wonde

Integration Guide

APAC

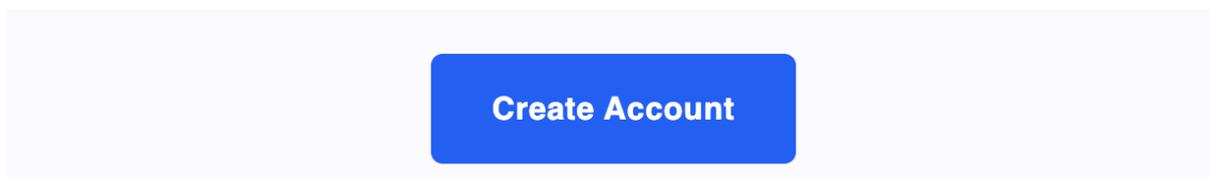

This document explains the process a school follows when they approve and connect Seesaw to their Student Information System (SIS) through Wonde.

****If you have created your Wonde account and approved Seasaw already, please refer to Page 4, Section 3 (Dynamic Filtering and Access Control) to select which classes and Seasaw admins you would like to sync.***

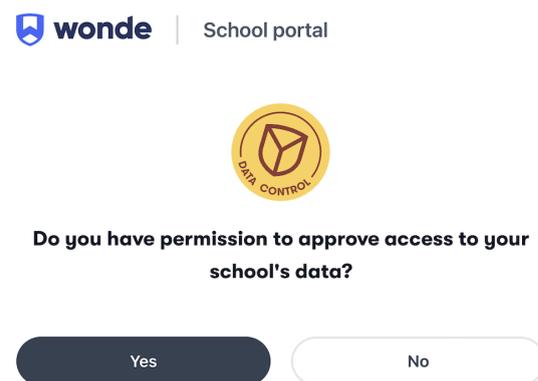

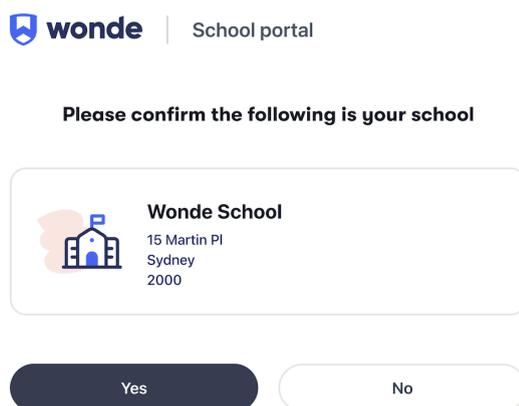

1) Creating your school's Wonde account

Once your first application has requested to connect to your school, an email is sent from Wonde with a secure link for the school to create their Wonde account.

a) Open the email and click '**Create Account**'.

b) You will then be taken to your school's Wonde portal. Here you will be asked to confirm your school name and that you have permission to approve access to school data stored in your Student Information System.

NB: If you don't have permission, an additional screen will ask for the correct contact details to be added. A new email invite is then sent to the relevant person.

- c) Continue to fill out the remaining fields and then click '**Create account**'.
Your school's Wonde account will then become active and you will be able to review and approve the requests from third party applications to connect.

Enter your details to create your Wonde account

First name	Last name
<input type="text" value="School"/>	<input type="text" value="Admin"/>
Email address	
<input type="text" value="ntaylor+admin@wonde.com"/>	
Role at school	
<input type="text" value="Principal"/>	
<input checked="" type="checkbox"/> I confirm I have read and agree to Wonde's Data Processing Agreement , Licence Terms and Privacy Notice , Terms of Use .	
<input type="button" value="Create account"/>	

You will then be taken to the **Applications** page where you can review the Seesaw request to connect.

2) Approving Seesaw

Each time the user logs into their Wonde portal, they arrive at the **Applications** page which displays any new pending applications that have requested to connect and are therefore **'Pending Approval'**.

- a) Click on Seesaw and then 'Permissions', to review the data Seesaw is requesting be shared. This is the same data that the school would previously be sending to it via a spreadsheet or manually inputting.
- You can see the list of each data set (Permissions) that Seesaw has requested be shared, in order for it to work most effectively.
 - Permissions are either 'Required' or 'Optional'.
 - Required – The basic data that the app requires in order to function.
 - Optional – Are often used for additional modules that an app has which not all schools use and hence you can toggle these on/off as needed.
 - If a group of Permissions (e.g. Attendance) is selected, such permissions are shown on a granular level to highlight the individual fields..

2 optional permissions

11 new permissions

+

b) Choose to Approve or Decline the connection.

✓ Approve access

✗ Decline access

When you **Approve access**, an email approval receipt is sent to the school and to the application. The email receipt details the permissions, who approved them, their position and the date/time they were approved.

If the **Decline access** option is selected, the app will receive the relevant notification.

In the future, each time an application makes a change to their permissions or requests additional data in order for a new feature to work, the school will be prompted to review and approve it before the app can access the new Permissions.

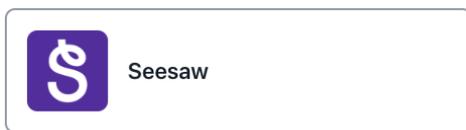

If the school has already completed the Integration to your Student Information System then you can skip this step.

3) Dynamic Filtering and Access control – Select which classes and Seesaw admins you would like to sync

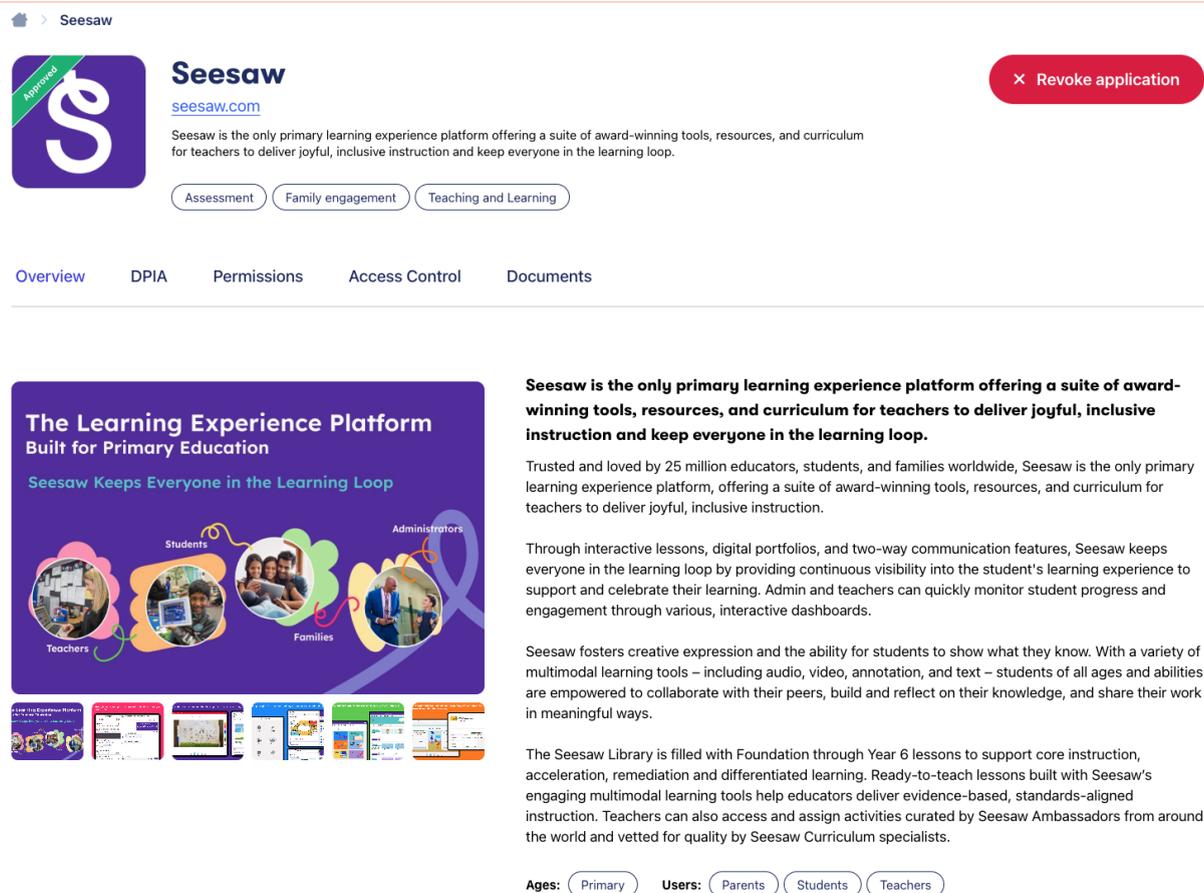

Wonde allows a school to control precisely which classes are synced to Seesaw and which employees they would like to be set up as Seesaw Admins using Dynamic Filtering and Access Control.

To manage these, firstly:

- Ensure the Seesaw has been Approved from within the **Applications** page.

- Click on the Seesaw tile and then the **'Access Control'** tab.

The Learning Experience Platform
Built for Primary Education
Seesaw Keeps Everyone in the Learning Loop

Teachers Students Families Administrators

Seesaw is the only primary learning experience platform offering a suite of award-winning tools, resources, and curriculum for teachers to deliver joyful, inclusive instruction and keep everyone in the learning loop.

Trusted and loved by 25 million educators, students, and families worldwide, Seesaw is the only primary learning experience platform, offering a suite of award-winning tools, resources, and curriculum for teachers to deliver joyful, inclusive instruction.

Through interactive lessons, digital portfolios, and two-way communication features, Seesaw keeps everyone in the learning loop by providing continuous visibility into the student's learning experience to support and celebrate their learning. Admin and teachers can quickly monitor student progress and engagement through various, interactive dashboards.

Seesaw fosters creative expression and the ability for students to show what they know. With a variety of multimodal learning tools – including audio, video, annotation, and text – students of all ages and abilities are empowered to collaborate with their peers, build and reflect on their knowledge, and share their work in meaningful ways.

The Seesaw Library is filled with Foundation through Year 6 lessons to support core instruction, acceleration, remediation and differentiated learning. Ready-to-teach lessons built with Seesaw's engaging multimodal learning tools help educators deliver evidence-based, standards-aligned instruction. Teachers can also access and assign activities curated by Seesaw Ambassadors from around the world and vetted for quality by Seesaw Curriculum specialists.

- Select the names of the admins you would like to sync by ticking the boxes next to their names.

NB: You can search names using the search bar or by scrolling through your schools employees to select the admins.

- Select Mark as Included:

[+ Mark as included](#)

- The selected employees will now be marked as included to sync across and be set up as Seesaw admins.

NB: To make changes to your Seesaw admins in the future, you must make the changes here in your Wonde portal by repeating the above steps, ensuring you untick any employees you no longer want to sync to Seesaw.
